

PolyWedge

ISC

Security Seals

PolyWedge drum seal is for securing clamping rings around barrels and drums. The PolyWedge drum seal is flat with a wedge-shaped body. It is suitable for sealing apertures that are 15-16.5 mm wide and 3-3.5 mm deep. PolyWedge is supplied without any identification markings. Barrels or drums can be sealed by pushing the PolyWedge into the narrow, oblong sealing hole in the fasteners of their clamping rings. Once the drum seal is wedged in to a clamping ring fastener, it can only be removed using tools. PolyWedge is an indicative seal

APPLICATIONS

- Securing barrels and drums
- Securing tote boxes

FEATURES

- Easy manual application
- Suitable for clamping rings of drums and barrels

BENEFITS

- Prevents seal damage during transit
- Can be sealed with one hand
- Can only be removed using tools

SPECIFICATIONS

Type

PolyWedge, H.36 x W.17 mm

For clamping rings with width of 3/3,5 x 15/16,5 mm

Material
